Lotto, Powerball and Strike are the games to play if you want the chance to win big prizes. You can play twice a week with draws on Wednesday and Saturday.

The aim of the game is to match the numbers on your ticket to the ones drawn.

## LOTTO

**To play Lotto, you need six numbers (from 1 to 40) to make a line on your ticket. You need to play at least four lines to enter a draw.**

You can pick your own numbers or play a Dip, where random numbers are chosen by the Lotto NZ system.

At each live Lotto draw six winning Lotto numbers plus one bonus ball are drawn.

There are seven Lotto Prize Divisions. Division 1 is the top prize. To win Division 1 you need to match all six winning Lotto numbers on a single line of your ticket.

Division 7 is the easiest division to win. To win you need to match any three of the winning Lotto numbers on a single line of your ticket. [Learn more about the Lotto Odds and Payouts](#)

## LOTTO STRIKE

**Match any of the first four Lotto balls** in the order that they're drawn to win with Strike – match all four and you've won the top prize, Strike Four! The winning numbers must be on the same line of your ticket. You can add Strike to any Lotto or Powerball ticket or play on its own for just \$1 per line.

## POWERBALL

Add a Powerball to any Lotto line to be in to win the big Powerball jackpot. To play Powerball, you need to add a Powerball number between 1 and 10 to each line of your Lotto ticket. If a winning Lotto line also has the correct Powerball number, your prize gets even bigger.
